

B100
BIODIESEL STANDARDS
 Certified Reference Materials

Governments worldwide have passed new regulations that mandate lower levels of sulfur in biodiesel fuel. To coincide with the implementation of these regulations, SPEX CertiPrep now offers specifically designed Certified Reference Materials for industrial use. Our B100 Biodiesel standards meet the requirements for testing ASTM methods D6751, D5453, and

EN14214 (See below for a complete list). All SPEX CertiPrep standards are manufactured from the highest purity materials and rigorously tested to ensure that our products are of the highest quality. Each one also comes with a comprehensive Certificate of Analysis. If other concentrations are needed, our chemists can produce custom standards that meet your requirements; for a quote, please contact your local sales representative for additional information.

Part #	Conc. (ug/g)	Description	Size
BF-BLKY	N/A	Certified Matrix Blank B100	100mL
BF-BLKX			500mL
BFS-5Y	5	Sulfur in B100	100mL
BFS-10Y	10	Sulfur in B100	100mL
BFS-15Y	15	Sulfur in B100	100mL
BFS-20Y	20	Sulfur in B100	100mL
BFS-25Y	25	Sulfur in B100	100mL
BFS-50Y	50	Sulfur in B100	100mL
BFS-100Y	100	Sulfur in B100	100mL
BFM-5Y	5	Ca, K, Mg, Na, and P in B100	100g
BFM-10Y	10	Ca, K, Mg, Na, and P in B100	100g
BFM-15Y	15	Ca, K, Mg, Na, and P in B100	100g
BFM-20Y	20	Ca, K, Mg, Na, and P in B100	100g

? **Can't find the standard you are looking for?**

SPEX CertiPrep can custom make any standard in any combination. Call 1-800-LAB-SPEX or logon to www.spexcsp.com for more information.

Thanks to continuous innovation and research, SPEX CertiPrep has been the industry leader in the CRM marketplace for over 50 years. Our commitment to meeting the needs of laboratories worldwide and ensuring Total Customer Satisfaction is summarized by our motto, "Superior Quality and Unparalleled Service."
